

Aviation Friends,

Certification of the Embraer Phenom 100 Executive Jet is expected very soon.

To celebrate, Corporate Flight Management and JetQuik have arranged for a “Sneak Peek” of one of Embraer’s Flight Test aircraft on Friday December 5th, 12:00-2:00 PM. We have invited other guests who might consider Phenom 100 ownership.

Although this Phenom 100 will not have a completed interior it will be available for a close up inspection including Embraer's Prodigy™ flight deck. The Prodigy™ is based on Garmin's G1000 avionics system. This will be Nashville’s first opportunity to see the Phenom 100 and to explore its many features.

The pilot-friendly cockpit features three 12-inch displays two primary flight displays (PFD) and one multi-function display (MFD). The system integrates all primary flight, navigation, communication, terrain, traffic, weather, engine instrumentation, and crew-alerting system data.

Start clearing your Friday afternoon calendars and **join us for lunch** this Friday December 5, at Noon. John Tune Airport Hangar 2.

We are treating this like an open house so feel free to bring your friends.

Address: 220 Tune Airport Blvd. Hangar 2 is next to Wings of Eagles Flight School.
Hangar 2 is heated and we will have a sizzling airplane to show you all.

Directions:

From I-40 Westbound Exit onto Briley Pkwy. / TN -155 N via Exit 204A
